

YWBCH 2026 MedPro Publication Excellence Award

Supporting Outstanding Research Beyond the Conference

YWBCH 2026 is pleased to introduce the **YWBCH 2026 MedPro Publication Excellence Award**, a new award program for presenters of General Abstracts (e-Posters).

This award recognizes outstanding research presented at YWBCH 2026 and supports researchers in taking the next step toward broader academic dissemination. Award recipients will receive publication and presentation support services provided by **MedPro Clinical Research** as a special prize.

Why Was This Award Established?

Presenting at scientific conferences and publishing in peer-reviewed journals are essential steps in sharing research findings, advancing scientific knowledge, and fostering international collaboration.

However, transforming research results into successful publications often requires expertise in manuscript preparation, journal selection, scientific writing, English language editing, and effective presentation techniques. These challenges can be particularly significant for early-career researchers.

In the field of breast cancer in young women, many important issues remain to be addressed, including fertility and pregnancy, education and employment, survivorship, and long-term quality of life. By encouraging the dissemination of high-quality research, YWBCH 2026 aims

to promote collaboration and contribute to improved patient care and future research development.

The YWBCH 2026 MedPro Publication Excellence Award was established to help outstanding research presented at the conference reach a wider international audience and maximize its impact.

Eligibility

This award is open to presenters of **General Abstracts (e-Posters)** at YWBCH 2026. Award recipients will be selected from among the highest-rated abstracts presented at the meeting.

Award Benefits

Recipients will receive publication and scientific communication support services according to their award ranking.

First Prize

Select three (3) support services from the menu below.

Second Prize

Select two (2) support services from the menu below.

Third Prize

Select one (1) support service from the menu below.

Eligible projects: The support may be applied to the award-winning research or another research project within the same scientific field.

Available Support Services

Support Options	Details of Support
Scientific Editing Support (One Session)	• Scientific manuscript editing • English language editing and proofreading • Consistency and quality review • Journal-specific formatting support This service helps researchers refine their manuscripts and prepare them for submission to international peer-reviewed journals.
Journal Submission Assistance (One Session)	• Journal selection support • Cover letter preparation • Compliance review with journal requirements • Technical submission guidance Researchers receive practical assistance throughout the journal submission process.
Publication Planning Training & Support	• Training on publication strategy development • Guidance on future publication and presentation opportunities Designed to help researchers build a long-term publication and dissemination strategy.
Graphical Presentation Support (One Session)	• Poster design support • Presentation slide optimization • Communication and visual design consultation Professional design supports improving the clarity and impact of conference presentations.
Research Dissemination Strategy Advisory Support	• Post-publication communication planning • Conference presentation opportunities • Digital communication and outreach guidance • Support for Communicating with Stakeholders Support for maximizing the visibility and impact of research findings beyond publication.

Message from the Congress President

“Outstanding research creates value only when it is shared, discussed, and evaluated by the scientific community. This award not only recognizes excellence in research but also supports researchers in taking the next step toward maximizing the impact of their work and ultimately improving outcomes for patients. We hope this initiative will help transform promising findings into broader academic and clinical benefits.”

Shigehira Saji, MD, PhD

President, JBCRG (Japan Breast Cancer Research Group)

Congress President, YWBCH 2026

About MedPro Clinical Research

MedPro Clinical Research is a leading company specializing in medical writing, publication support, and evidence generation. The company has assisted in the publication of more than 100 scientific manuscripts and supports researchers in communicating their findings to international audiences.

Submit Your e-Poster to YWBCH 2026

YWBCH 2026 offers more than an opportunity to present your research.

Through the **YWBCH 2026 MedPro Publication Excellence Award**, exceptional research may receive professional support for publication, presentation, and scientific communication, helping your work reach a broader audience and achieve greater impact.

We encourage all researchers working in the field of breast cancer in young women to submit their abstracts and share their discoveries with the global community.

Note: This award is available to presenters of General Abstracts (e-Posters) at YWBCH 2026. Details regarding the selection process and number of award recipients will be announced on the conference website.
